

COMMANDANT'S CHALLENGE 04 – SCORING SYSTEM

Point allocation for the Comm's Challenge will have a top end weighting and will be directly linked to the time on the Comm's Challenge course. The fastest team will attract 120 points, the slowest only 16 points and all others somewhere in between (gradation at the top end will be 120, 110, 105, 100, 97, 94, 92, 90 and two point spacing thereafter). It is intended that all other scores will be published within 30 mins of a team's finish (as for last year). However, this new scoring system for the Comm's Challenge should keep the resolution of the overall competition placings in doubt until the very end of the event.
